ABSTRACT

This publication is volume 2 of the first annual report to Congress by the U.S. Commissioner of Education on uses of funds made available to the states through the federal grant-in-aid programs of the U.S. Office of Education. This particular volume presents an overview of the characteristics of the state records used to supply data for the report and provides summary tables of data aggregated to the state level. Chapter 1 describes the organization of the report and the specific types of data sought in the first year's collection effort. Chapter 2 provides an overview of the characteristics of the collected data, including a table describing the contents of the data by individual program and state. Chapter 3 presents a series of summary tables displaying the actual data collected, aggregated to the state level. (Author/JG)

1.0 INTRODUCTION

This document is Volume II of the first annual report to Congress by the U.S. Commissioner of Education and the States in response to Section 512 of the Education Amendments of 1974 (Public Law 93-380). In Section 512, Congress has mandated annual reports on the uses of funds made available to the States through the Federal grant-in-aid programs of the U.S. Office of Education.

The first annual report is contained in three volumes, as follows:

- Volume I presents a discussion of the current and future USOE strategy in meeting the legislation reporting requirements, the Federal-State education funding and grant administration process, and the characteristics of the State records used to supply the data for the final report. A detailed description of the characteristics of the data, the resulting implications for data analysis and interpretation, and a glossary of terms are also provided.
- Volume II presents an overview of the characteristics of the State records and provides summary reports of the data aggregated to the State level.
- Volume III contains the most detailed presentation of the data and is organized and bound by individual States. Reports in Volume III are presented on a program-by-program basis, displaying fiscal, participant, and purpose data for all grantee agencies receiving Federal funds.

1.1 Contents of Volume II

Volume II is organized into three chapters: Chapter 1, Introduction, describes the organization of the document and the specific data items sought in the first year's collection effort. Chapter 2, Data Characteristics, provides an overview of the characteristics of the collected data, including a table describing the contents of the data by individual program and State. Finally, Chapter 3 presents a series of summary tables displaying the actual data collected aggregated to the State level.

1.2 Data Items Sought During First Year's Collection Effort

The data presented in this report were collected during the period of August 4 to October 3, 1975. One-week visits were made to all 50 States to transcribe the information from State source documents.

1.2.1 Data Item Priorities

In recognition of the constraints imposed by the current State recordkeeping systems, data priorities for the first annual report were:

- Fiscal Data--Final obligations made by the State to each substate agency from Federal FY 74 funds for each State administered program. Final obligations are defined as the latest budget amount of awards to substate agencies, reflecting all amendments and obligations. Data would be aggregated to the substate agency.
- Beneficiary Data--The number of direct participants in projects operated by each substate agency supported by Federal FY 74 funds. Data would be aggregated to the substate agency.
- Purpose Data--For ESEA IA and VEA IB, an indication of the purpose for which Federal FY 74 funds were used by each recipient substate agency. These programs were selected since they receive the greatest amount of Federal funding and generally distribute funds to the widest range of eligible substate agencies. As with fiscal and beneficiary data, purpose data were to be recorded on a substate agency level, rather than an individual project level.

The above data were collected for the "second preceding fiscal year," Federal FY 74. Data were not obtained for the "first preceding fiscal year," Federal FY 75, due to the late start in the collection activity and the magnitude of the effort required to collect data.

In lieu of the detailed substate obligations made from Federal FY 75 funds, data on total obligations made by the States from these funds as of June 30, 1975, were collected for each program area to show the carryover of Federal funds to the following year.

Additionally, to permit ready identification of substate agency recipients, two other data items were sought. These were:

- Agency Name--The official name of each grant recipient of Federal FY 74 funds from each of the 26 State administered programs.
- Agency Type--The identification of each substate agency receiving Federal FY 74 funds as to organizational form, i.e., local education agency (LEA), institution, intermediate school district, or State agency.

1.2.2 Alternative Acceptable Data Items

The above data items constituted the first collection priorities. In the event that desired fiscal or beneficiary data were not readily available, several alternatives were established.

- Fiscal Year Obligations--In the event that the State records would not readily support the identification of substate obligations made from Federal FY 74 funds, data on substate obligations made during the 1973-74 fiscal year were to be recorded. Such data represents funds obligated to support a given period of time--in this case the 1973-74 fiscal year. As such, the funds may include FY 74, FY 73 carryover, or FY 73 impounded funds.
- Initial or Intermediate Obligations--In the event that final obligations reflecting all amendments and reobligations were not readily available, the initial or intermediate obligations were to be recorded.
- Estimated Beneficiaries--If data or actual direct beneficiaries served by the projects in each substate agency were not available, planned or estimated beneficiary data were to be recorded to provide an identification of the target population reached. Further, if beneficiary data could not be related to specific projects funded by the Federal FY 74 appropriation act,

total beneficiaries served by the substate agency during the 1973-74 fiscal year were to be recorded.

2.0 DATA CHARACTERISTICS

The previous section described the data sought during the collection effort. As indicated in Volume I, the desired data were frequently unavailable, incomplete, or in a form which made it impractical to collect within the time constraints. This section presents the characteristics of the data actually collected.

2.1 Overview of Data Characteristics

This section presents an overview of the most common limitations, including areas of variability of the data. Three data item categories are discussed:

- Fiscal data
- Beneficiary data
- Purpose data

2.1.1 Fiscal Data

In attempting to obtain final obligations made to substate agencies from Federal FY 74 funds, the most common difficulties were:

- Difficulty in Separating Funds From Different Federal Appropriation Years--In many instances, the State records did not permit ready identification of obligations to substate agencies made from Federal FY 74 funds. The data collected instead represented obligations made during the 1973-74 fiscal year, for which the source of funds may have been Federal FY 73, FY 74, or FY 73 impounded funds.

- Difficulty in Separating Federal and State Funds--In certain cases, primarily in vocational education programs, Federal and State funds were commingled for distribution to substate agencies. In such cases, obligations made to substate agencies could not be readily identified by source of funds, and thus the data collected represent the sum of both Federal and State funds.

- Collection of Data at Different Points in the Funding Cycle--Occasionally, fiscal obligation data were not available, and the data collected may represent initial or intermediate obligations or, in a very few cases, expenditures.

- Difficulty in Identifying Unused Funds Returned to the USOE or the SEA--In a few States and program areas, State records on total obligations made to substate agencies did not readily identify unused funds which were returned to the USOE. Similarly, in a few cases, final obligation figures did not reflect funds which were returned to the State unused by the agencies.

- Difficulty in Separating Obligations Made From the Commissioner's Discretionary Funds and State Administered Funds--In a few States and programs, primarily VEA IC and ID, the obligation data collected represented grants made from the Commissioner's discretionary funds as well as State administered program funds.

2.1.2 Beneficiary Data

In the collection of beneficiary data for the applicable programs, the most common difficulties were:

- Unavailability of Data On Actual Direct Beneficiaries--In many instances, counts of actual program participants were not maintained by the State or were not readily available. In such cases, planned participant counts were obtained from project proposals and recorded as estimated figures.

- Duplicate Counts--In the majority of cases, unduplicated participant counts were not maintained by the States, and thus the figures recorded represent duplicated counts.

- Lack of a Common Method for Counting Beneficiaries--The States and program areas varied widely in the method of counting beneficiaries. The methods used include average daily membership, average daily attendance, and others. No attempt was made to standardize the count.

- Difficulty in Identifying Beneficiaries Served by Source Of Funds--In certain programs, primarily vocational education programs, both State and Federal funds are directed at the same project activities. State records rarely permitted a separation of participant counts by source of funds. Thus the beneficiary data expressed the combined effect of both Federal and State funds.

- Incomplete Beneficiary Data--In addition to the above problems, there were cases where neither actual nor estimated counts were readily available. This most frequently occurred in vocational education programs, where beneficiary data were maintained by course, such as VEA IB; thus the particular State administered program area was not readily identified. In such cases, no beneficiary data were recorded.

2.1.3 Purpose Data

Because it was not feasible to determine the funds obligated by purpose category, only general indications as to the type of purpose, e.g., courses offered to the target population, were recorded. The two most common difficulties in the collection of purpose data were:

- Unavailability of Purpose Data in a Usable Form--State records frequently could not provide adequate data on the specific purposes for which funds were expended.

- Inadequate Number of Purpose Categories--States frequently expended the money for purposes other than the few predefined categories.

2.2 Detailed Presentation of Data Characteristics

In the first year's collection effort, the primary data sought were:

- Final obligations to substate agencies made from Federal FY 74 appropriation act funds.

- Actual direct beneficiaries served in intrastate agencies from projects supported by Federal FY 74 funds.

On the whole, 76 percent of the States and Territories provided funds obligated from the FY 74 appropriation act for all programs. Eighty percent of the States and Territories were able to provide final obligations made. Ninety percent of the States and Territories were able to provide either actual or estimated beneficiaries for all of the applicable programs.

Table 1 characterizes fiscal and beneficiary program data collected from State records. Specifically, the following characteristics are indicated in the table:

- Obligation Content (First element in cell)
- Funding Cycle (Second element)
- Beneficiary Content (Third element)

The first element (Obligation Content) indicates the source of funds on the basis of the following letter-coded categories:

- F--Federal 1974 Appropriation Act Funds--Dollar amounts represent funds obligated from the FY 74 appropriation act only.
- CF--Commingled Federal Funds--Dollar amounts represent a mixture of FY 73 Federal carryover funds, FY 73 impounded funds, and FY 74 Federal funds.
- CFS--Commingled Federal and State Funds--Dollar amounts represent the combined total of Federal funds and State funds obligated for the 1973-74 fiscal year.
- PF--Prorated Federal Funds--Dollar amounts represent FY 74 Federal funds obtained by applying a ratio of Federal to State dollars to the commingled funds found on the source documents.

The second element (Funding Cycle) describes the data in terms of the point of capture during the funding cycle, as follows:

- IO--Intermediate Obligation--Dollar amounts represent obligations made prior to the final award amount.
- FO--Final Obligation--Dollar amounts represent the final obligations to substate agencies, including the amendments.

- E--Expenditures--Dollar amounts represent charges made for services and materials, whether paid or unpaid, in support of the program.

- D--Disbursements--Dollar amounts represent actual cash advances or reimbursements from the SEA to the substate agency for services or materials in support of the program.

The third element (Beneficiary Content) characterizes the beneficiary or participant data in terms of reliability of counts, as follows:

- NC--Not Collected--Beneficiary data were not collected or sought for the program.

- EB--Estimated Beneficiaries--Counts represent an estimate of direct beneficiaries or participants for the substate agency under the program.

- AB--Actual Beneficiaries--Counts represent the actual number of direct beneficiaries or participants for the substate agency under the program.

As discussed in Volume I, similarities in data content vary according to program groupings. The following paragraphs highlight the various characteristics:

- AEA Title III--Seventy-one percent of the States and Territories were able to provide funds obligated from the FY 74 appropriation act; 86 percent were able to provide final obligations; and 61 percent were able to provide actual beneficiaries for the applicable program.*

- ESEA Title I, II, III, and V--An average of 95 percent of the States and Territories were able to provide funds obligated from the FY 74 appropriation act. An average of 92 percent were able to provide final obligations, and an average of 88 percent were able to provide either actual or estimated beneficiaries for the applicable ESEA programs.

---

*See Volume I, Exhibits 4, 5, and 6 for more detailed descriptions of beneficiary data that was collected.

- VEA Title I--An average of 60 percent of the States and Territories were able to provide funds obligated from the FY 74 final obligations; about 78 percent were able to provide final obligations; and an average of 88 percent were able to provide either actual or estimated beneficiaries for the applicable VEA programs.

- EHA Title VI-B--Ninety-five percent of the States and Territories were able to provide funds obligated from the FY 74 appropriation act; 95 percent also were able to provide final obligations; and 98 percent were able to provide either actual or estimated beneficiaries for the program.

- NDEA Title III--Ninety-one percent of the States and Territories were able to provide funds obligated from the FY 74 appropriation act; 86 percent were able to provide final obligations. Direct beneficiary data were not collected for this program.

- HEA Title I, IV, and Morrill Act; Bankhead Jones Act--One hundred percent of the States and Territories were able to provide funds obligated from the FY 74 appropriation act; 99 percent were able to provide final obligations; and 99 percent were able to provide either actual or estimated beneficiaries for the programs.

- LSCA Titles I, III--Expenditure data were provided for 93 percent of the States and Territories. These expenditure data contain commingled Federal FY 73 and FY 74 obligations. Beneficiary data were not sought for the LSCA programs.

3.0 SUMMARY PRESENTATION OF DATA

Chapter 3 contains a series of 10 tables aggregating the data to a State level. The tables and accompanying explanations are presented in the following order:

3.1 Table 2: Federal FY 74 Funds Made Available for State Administered Programs

3.2 Table 3: Federal FY 75 Funds Made Available for State Administered Programs

3.3 Table 4: Federal FY 75 Funds Carried Over by States for State Administered Programs

3.4 Table 5: Methods Used by States to Obligate Federal FY 74 Funds

3.5 Table 6: Fiscal Year 1974 Funds Obligated by State Under State Administered Programs

3.6 Table 7: Fiscal Year 1974 Federal Funds Obligated by State and Type of Agency Under State Administered Programs

3.7 Table 8: Estimated Percentages of Local Education Agencies Receiving Fiscal Year 1974 Federal Funds by State and Program Under State Administered Programs

3.8 Table 9: Number of Direct Program Participants or Beneficiaries, Fiscal Year 1974 State Administered Programs

3.9 Table 10: High, Median, and Low Numbers of Direct Program Participants or Beneficiaries, Fiscal Year 1974 State Administered Programs

3.10 Table 11: Number of Direct Program Participants or Beneficiaries, Fiscal Year 1974 State Administered Programs by Type of Agency

3.1 Federal FY 74 Funds Made Available for State Administered Programs

Table 2 displays the Federal funds for education obligated to State agencies by USOE from Federal FY 74 appropriation act funds. These funds were made available for intrastate distribution in compliance with the guidelines of each program. All figures recorded are rounded to the nearest thousand dollars. The vertical axis lists the 25 State administered programs on which data were collected by act, title, program name, and OMB catalog identification number. States and Territories are listed alphabetically along the horizontal axis. U.S. totals by program appear in the last column. For example, the total amount available for the Adult Education program, AEA III, was $54,290,000.

In examining the table, it should be noted that the figures displayed represent the amount of Federal education funds made available to the States from the 1974 appropriation act. A State or Territory may choose not to participate in a Federal education program, and when this occurs, no program funds are listed for that program in the State. States and Territories may also decide not to utilize the total amount of funds made available to them. The funds not utilized or returned to USOE are not reflected in the figures presented in the table.

3.2 Federal FY 75 Funds Made Available for State Administered Programs

Table 3 displays the funds for education obligated to State agencies from Federal FY 75 appropriation act funds. These funds were made available for intrastate distribution in compliance with the guidelines of each program. All figures recorded are rounded to the nearest thousand dollars. The vertical axis lists the 25 State administered programs on which data were collected by act, title, program name, and OMB catalog identification number. States and Territories are listed alphabetically along the horizontal axis. U.S. totals by program appear in the last column. For example, for FY 75 the total amount available for Adult Education, AEA III, was $67,500,000.

In examining the table, it should be noted that the figures displayed represent the amount of Federal education funds made available to the States from the 1975 appropriation act. A State or Territory may decide not to participate in a Federal education program, and when this occurs, no program funds are listed for that program in the State. States and Territories may also decide not to utilize the total amount of funds made available to them. The funds not utilized or returned to USOE are not reflected in the figures presented in the table.

3.3 Federal FY 75 Funds Carried Over by States for State Administered Programs

Table 4 displays the amount of funds left unobligated by the States' agencies from the Federal FY 75 appropriation act as of June 30, 1975. The unobligated or carryover funds are also shown as a percentage of the total program grant. All dollar amounts are rounded to the nearest thousand.

In lieu of detailed substate obligations made from Federal FY 75 funds, total obligations made by the States as of June 30, 1975, from Federal FY 75 funds were collected for each program area to show the carryover of Federal funds to the following year.

The vertical axis lists the 25 programs by act, title, program name, and OMB catalog number. The States are listed alphabetically along the horizontal axis.

If a State did not participate in a program, dashes appear in the program cell. Data on the five territories, LSCA I and III, HEA I and IV A, and the Morrill Act/Bankhead-Jones Act are not recorded because carryover figures were not available at the time of collection.

The left-hand column under each State shows the total funds left unobligated as of June 30, 1975. The right-hand column under the State shows the percentage of the carryover to the total grant. For example, in ESEA I--Handicapped, Alabama carried over $162,000, representing 26 percent of the total amount received.

*EXCLUDES TERRITORIES

3.4 Methods Used by States to Obligate Federal FY 74 Funds

Table 5 lists by program the methods used by the States to obligate Federal funds for education to substate agencies. A code defining the various types of obligation methods is provided to explain the entries, as follows:

- E--Entitlement--The grants are based on the relative weighting or one or more variables such as population density, income level, or previous year allocation.
- F--Formula Ranking--Priority of awards is established by a relative need process. Funds may be distributed in any manner so long as the relative rankings are maintained.
- D--Discretionary--Obligations are based on a competitive process. Awards are on the basis of individual grant application reviews.

Two different methods of obligation may sometimes be indicated in order to provide the best characterization of the process used to distribute monies in a particular program within a given State. If a State or Territory did not participate in a State administered program, dashes appear in that data cell.

The States and Territories are arranged alphabetically along the horizontal axis. The vertical axis lists the 25 programs by act, title, program name, and OMB catalog numbers.

Summary figures for each State or Territory are also provided in the table, indicating the number of programs using each of the three obligation methods. For example, the figures "16=E, 3=F, 6=D," under the Alabama column means that 16 of the 25 applicable State programs (LSCA II was not funded in FY 74) were allocated to substate agencies on an entitlement basis, 3 programs used a formula-ranking method, and 6 employed a discretionary method.

In the last column of the table, program summary figures present the frequency with which the various distribution methods were used in the country as a whole.

3.5 Fiscal Year 1974 Funds Obligated by State Under State Administered Programs

Table 6 displays by program the State totals for awards made to substate agencies, as collected from State records. This is intended to represent obligations made by the State to grantee agencies from Federal FY 74 funds. All figures record dollars in thousands.

The vertical axis lists the States in alphabetical order, followed by the Territories. The horizontal axis identifies each of the 25 State administered programs, grouped by title to facilitate examination of the data. Because of space limitations, the programs are spread over three pages. The first row of figures represents national program totals of obligated funds obtained by summing each column of State totals. For example, in the Adult Education program, AEA III, $53,816,000 was obligated nationwide to grantee agencies.

Total funds obligated by States participating in the Federal education programs may differ from the total presented in Table 2, which represents the Federal funds made available to the State by USOE from the 1974 appropriation act. As discussed in detail in Volume I, the figures shown in Table 6 were collected from records available at State-level agencies. If fiscal information was available according to the Federal year of appropriation, the total obligations should approach the total amount the State had available to obligate. However, if for various reasons discussed in Volume I, the data did not permit tracking of fiscal data by Federal year of appropriation, then the total obligations will not reconcile with the total of available Federal funds. Additionally, the inclusion of funds from several sources, or funds representing different points in the funding cycle, will prevent the reconciliation of the data with the total of Federal funds available.

3.6 Fiscal Year 1974 Federal Funds Obligated by State and Type of Agency Under State Administered Programs

Table 7 refines the information presented in Table 6. Program-by-program, it shows the monies obligated by the States to grantee agencies, broken out by type of receiving agency. The table displays this breakout by agency type, both in absolute dollar amounts and as a percentage of total program funds. All fiscal figures record dollars in the thousands, and all percentages are rounded to the nearest whole number.

The vertical axis arrays the States in alphabetical order, followed by the Territories. The five types of agencies receiving funds are broken out within each State and Territory. The five agency types into which State and substate-level agencies receiving funds were classified are as follows:

- Local Education Agency (LEA)--A public board of education or other public authority legally constituted within a State for either administrative control or direction of elementary and secondary education.

- Institution--An organizational unit such as a private or public school, church, community college, hospital, or reformatory, having a social, educational, or religious purpose.

- Intermediate School District--An organizational unit with administrative and fiscal authority to provide and operate educational programs on a regional or multi-school district basis.

- State--(1) Programs operated by any State government department or division such as a department of mental health or division of corrections, (2) programs administered directly by the State education agency, and (3) funds used at the State level for administrative purposes.

- Other--A catch-all category for the inclusion of various agencies such as labor unions or charitable organizations.

The horizontal axis lists the 25 State administered programs, grouped by title for ease of reading. Because of space limitations, these programs are spread across three pages. The first row gives the U.S. program totals of obligated funds, obtained by summing each column of State totals. The dollar and percentage breakouts by agency type sum to the State program total of obligated funds. If a single agency type received all (or rounds to 100 percent) of the funds, the percent column contains a percent sign (%); for example, in Alabama all of the funds under the Morrill Act went to institutions.

NOTE: -- INTERPRETATION AND ANALYSIS OF DATA IS SUBJECT TO
LIMITATIONS DEFINED IN TABLE 1.

3.7 Estimated Percentages of Local Education Agencies Receiving Fiscal Year 1974 Federal Funds by State and Program Under State Administered Programs

Table 8 presents the percentage of LEAs awarded funds from Federal FY 74 education appropriations by the States under the applicable State administered programs. These percentages are estimates obtained by dividing the number of LEAs which were awarded Federal FY 74 appropriation act funds by the total number of LEAs in each State.

The vertical axis lists the States in alphabetical order, followed by the Territories. The horizontal axis lists the 18 applicable programs, grouped by title to facilitate examination of the data. Because of space limitations, the programs are spread over two pages. The first column of the table indicates the total number of LEAs in each State as a point of reference in reading the table. The remaining columns indicate what percentages of the LEAs receive funds under the respective programs.

It should be noted that in certain States the percentage of LEAs receiving funds under a particular program may be low due to a practice of obligating funds to a single LEA, which in turn acts as an administrating agency for several surrounding LEAs. In these situations, only one LEA was recorded as receiving funds when in actuality several LEAs benefited from the funds, thus showing a lower percentage of participation than is the true case.

3.8 Number of Direct Program Participants or Beneficiaries, Fiscal Year 1974 State Administered Programs

Table 9 displays by program the number of direct participants in, or beneficiaries of, Federal FY 74 State administered programs. This table includes only those 17 programs for which direct participant data were both appropriate and available.

The figures represent the State total of direct program participants as summed from listings of individual project participant figures collected from State records. This aggregation of data to the State level results in duplicated counts which inflate the overall number of direct program participants. In this first data collection effort, no actual unduplicated counts of direct participants were available at the State level.

The States are listed alphabetically along the vertical axis and are followed by a listing of the Territories. The horizontal axis displays the 17 applicable programs, once again grouped by title. Because of space limitations, the programs are spread across two pages The first column gives the total number of persons directly impacted by FY 74 State administered programs for each of the States and Territories. The national totals of persons benefiting from these programs appear as program-by-program summary figures in the first horizontal row. Blanks in the table indicate that a given State's program was funded, but data on beneficiaries were unavailable.

3.9 High, Median, and Low Numbers of Direct Program Participants or Beneficiaries, Fiscal Year 1974 State Administered Programs

Table 10 presents the highest, the median, and the lowest number of persons directly participating in an individual agency's projects in each of the applicable programs. To obtain this information on the range of numbers of persons directly benefiting from Federal education funds, the complete array of individual agency listings for each program in every participating State was scanned. From this complete set, the individual agencies in which the numbers of program participants were the largest, the smallest, and the median (that figure which cut the distribution into two equal parts) were selected for inclusion in this table.

The vertical axis arrays the States alphabetically, and each State heading is followed by the total, the highest, the median, and the lowest sub-headings. The horizontal axis lists the applicable programs, grouped by title to facilitate examination of the information. Because of space limitations, the programs are spread across two pages.

The first column of the table displays the highest, the median, and the lowest number of direct participants across the program titles for each of the States. The first row of the table gives the total, the highest, the median, and the lowest number of direct program participants within the U.S. These figures represent those individual agencies, from the universe of all agencies within the States providing Federal education programs, whose projects have the extreme high and low as well as the median numbers of persons benefiting from the use of 1974 Federal education funds. Blanks in the table indicate that a given State's program was funded, but data on beneficiaries were unavailable.

3.10 Number of Direct Program Participants or Beneficiaries, Fiscal Year 1974 State Administered Programs by Type of Agency

Table 11 displays by program the number of direct participants in Federal FY 74 State administered programs according to the type of agency receiving the funds. These figures represent for the U.S. and for each State and Territory the number of persons directly benefiting from Federal programs administered by the five types of agencies. The States and then the Territories are listed down the vertical axis.

The five types of fund-receiving agencies are to be defined and understood as in Table 7 and are listed as sub-headings under the States, as follows:

- Local Education Agency (LEA)
- Institution
- Intermediate School District
- State
- Other

The 17 applicable programs are grouped by title along the horizontal axis. Because of space limitations, the programs are spread over two pages. U.S. totals obtained by summing the columns are presented in the first row of the exhibit. Blanks in the table indicate that a given State's program was funded, but data on beneficiaries were unavailable.
